

Central Valley Energy Tune Up Program

“ASHRAE Level 2 energy audit services were performed at 14 schools in our district. The reports were very detailed and informative at reporting energy saving opportunities with cost analysis associated with implementing each recommended measure. Being an energy manager for 13 years, I have performed many audits and ConSol easily outshined the others in their thoroughness and attention to details in identifying and reporting of energy efficiency measures.”

Frank DiLiddo
Energy Manager
Fresno Unified School District

Client

City of Fresno, CA

Project Location(s)

California

Project Description

The City of Fresno developed the Central Valley Energy Tune-up program over the past three years in collaboration with PG&E and designed the program to provide services not included in traditional energy efficiency programs within California as a way to improve the regional economy through reducing costs for energy. This program is designed to complement residential rebate programs including, but not limited to, Energy Upgrade California, and commercial rebate and financing programs.
